### About Conference

It is our great pleasure to welcome you to the “5th International conference on Astronomy, Astrophysics and Space Science” which is going to be held during June 27-28, 2022 at Budapest, Hungary. Astrophysics 2022 is trending under the theme “Big Ideas and Thoughts of Astronomy, Astrophysics and Space Science” which brings together leading scientists, professors, engineers, researchers, scholars, students and market leaders from all areas of Physics, Chemistry, Mathematics, computing, Geology and Biology etc.

Astrophysics 2022 aims to need along a multi-disciplinary cluster of the scientists and Researchers, astronauts gift and exchange breakthrough ideas regarding Early Universe, Physics and natural philosophy, astronomy and attractive force Waves, aeronautic and house Engineering, attractive force Physics and Cosmology, Cosmic Microwave Background and Radiation, biology and physical science, Astrochemistry and qualitative analysis, lepton and Nuclear astronomy, Planets, Comets, Asteroids and dirt, high-energy physics and Higgs particle, house Missions and Satellites, Exoplanets and Planetary Physics, substance, Dark Energy, and Black Holes, Optical natural philosophy and Optoelectronics, Astronomical Computing and Applications, Sun, system and extra star, Planetary Systems, Galaxies and huge Bang Theory, Earth and part science, Stars, Cool Dwarfs, Brown Dwarfs, Supernovae, Planetary Nebulae and star Remnants, Stellar Evolution, Atmospheres and Winds, massive scale surveys and Future experiments, Industrial and Medical applications. It endorses highest exploration and to widen the excellence analysis in universal, therefore making conferences, performances and assistances further globally competitive.

### Why to Join?

ASTRO MEET 2022 conference brings along specialists, leading researchers, scholars, scientists, professors from all areas of Physics, Chemistry, engineering, region engineering, astronautics, procedure area Science and alternative connected areas for interaction, exchange the new ideas and collaborations. Opportunity to attend the shows delivered by eminent Scientists, researchers, specialists from all over the world. Participation in sessions on specific topics on that the conference is foreseen to understand progress, world networking in transferring and exchanging ideas, Share your excitement in promoting new ideas, developments and innovations in physical science and area Science.

## Market Analysis

The Global telescope Market is projected to develop from 207.1 thousand units in 2018 to 427.4 thousand units in 2026 with a CAGR of 9.2% over the gauge time frame. The market is anticipated to prevail in USD 345.1 Million by 2026, steady with a substitution report by Reports and Data. this will be mostly contributed by the occasion of cosmic examination and expanding extent of beginner stargazing, ascend inside the interest for astrophotography and a spotlight earned because of science fiction movies and comic cons. The mechanical and logical improvement in stargazing, principally in regions like gadgets and optics turned into a significant a piece of our way of life. Applications like cell phones, PCs; worldwide situating frameworks (GPS), correspondence satellites, sunlight powered chargers, and reverberation imaging (MRI) scanners are acquiring prevalence in a few areas of the market. Cosmology isn't one among financial measure even subsequent to giving an abundance of significant, mechanical, and money related increases.
