Prestigious Award for Young Research's at [Materials Congress 2020] - Discovering New Exploration in Materials Science and Nanotechnology field

Conference Committee is glad to announce "**25th International Conference on Advanced Materials Science and Engineering**" throughout **November 16-17, 2020** in **Paris, France** by target the theme: "**Exploring the New Advancements in Materials Science and Nanotechnology Research**"

[Materials Congress 2020] developments area unit maintaining their momentum. Materials Science Conference program delves into strategic discussions.

[Materials Congress 2020] **Young person Awards:**

[Conference Committee](#) is supposed to honour prestigious award for gifted [Young researchers](#), scientists, Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior college in recognition of their outstanding contribution towards the conference theme. The Young person Awards create each effort in providing a robust skilled development chance for early career academicians by meeting specialists to exchange and share their experiences on all aspects of .

Young Research's Awards at [Materials Congress 2020] for the Nomination: Young scientist Forum - Outstanding Masters/Ph.D./Post academic degree thesis work Presentation, solely twenty five shows acceptable at the **[Materials Congress 2020]** young analysis forum.

[Materials Congress 2020] provides best platform to expand your network, wherever you'll meet scientists, authorities and [CROs](#) from round the world. It's it slow to grab the chance to hitch **[Materials Congress 2020]** for promoting your analysis article and to facilitate prestigious award all told classes. During this fame, we glance forward for your contribution and astonishing dedication to form our **[Materials Congress 2020]** additional winning.

Benefits:

- Young person Award recombination certificate and souvenir to the winners

- Our conferences offer best Platform for your analysis through oral shows.
- Learn regarding career improvement with all the newest technologies by networking.
- Young Scientists can get acceptable and timely info by this Forum.
- Platform for collaboration among young researchers for higher development.
- Provide a chance for analysis interaction and established senior investigators across the world within the field
- Share the ideas with each eminent researchers and mentors.
- It's a good privilege for young analysers to find out regarding the analysis areas for increasing their research data.

Eligibility

- Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior college with a minimum of five years of analysis expertise
- Presentation should be into scientific sessions of the conference.
- Each Young scientist / Young person will submit only 1 paper (as initial author or co-author).
- Age limit- but 35yrs
- All submissions should be in English.

Criteria for choice

Showcase your analysis through oral shows.

Learn about career development and therefore the latest analysis tools and technologies in your field.

This forum can offer pertinent and timely info to World Health Organization those that people who conduct analysis and people who use and like analysis.

Develop a foundation for collaboration among young researchers.

The forum can offer a chance for collegial interaction with alternative young investigators and established senior investigators across the world.

Interact and share ideas with each peers and mentors.

Opportunity for young analysts to find out regarding the research areas of their peers to extend their capability as multidisciplinary researchers.

Actively distribute info and promote the advantages of education and career matters.

Awards & Rewards

Showcase your analysis through oral shows.

Learn about career development and therefore the latest analysis tools and technologies in your field.

This forum can offer pertinent and timely info to World Health Organization those that people who conduct analysis and people who use and like analysis.

Develop a foundation for collaboration among young researchers.

The forum can offer a chance for collegial interaction with alternative young investigators and established senior investigators across the world.

Interact and share ideas with each peers and mentors.

Opportunity for young analysts to find out regarding the research areas of their peers to extend their capability as multidisciplinary researchers.

Actively distribute info and promote the advantages of education and career matters.

After gaining a very favourable outcome out of the past conference in the Materials Science Lexis, CPD accredited- International Conference on Advanced Materials Science and Engineering – Materials Congress 2020; Lexis takes all the pride in announcing the Upcoming Conference in the successful series of Materials Congress 2020.

Session tracks are Material Science and Engineering, Nano Technology and Nano Materials, Polymer Science and Polymer Engineering, Electric, Magnetic and Optic Materials, Ceramics, Glasses and Composites, Bio Materials Green Technologies, Mining and Metallurgy, Crystallography, Energy Materials and Electrochemistry, Carbon, Graphene and 3D Printing, Semiconductors, Materials Informatics, Kinetics and Thermodynamics, Recycling Materials, Structural Engineering and [Aerospace Structures](#), Catalysis Engineering, Environmental Engineering, Surface Science &

Engineering, Physics and Chemistry of Materials, Nanotechnology in Energy, Nano-Electronics & Microsystems, Nano Computational Modelling.

The International Conference on Advanced Materials Science and Engineering – Materials Congress 2020, is going to happen on the 16th and 17th November 2020 in Paris, France. Materials Congress 2020 desires at integrating all the renowned Materials Science Engineers, Researchers and Doctors, Industries, Fellowship holders, Residents, Pharmaceutical industries in the field of Materials Science and Nanotechnology. The objective of this conference is to gather like-minded coteries to facilitate the flow of ideas, thoughts, suggestions and motivations.

This Materials Congress runs on the theme 'Exploring the New Advancements in Materials Science and [Nanotechnology](#) Research' which concedes that Materials Congress 2020 will act as a platform for exploring the novelties in the field of Engineering.

Materials Congress 2020 will serve a great opportunity for the delegates of universities and Institutions as it allows people to interrelate with world-class Materials scientists, Engineers and Businesspersons. Materials Congress 2020 will not simply be a stage estimation in a gigantic event of people, yet additionally, it's an attempt to spread research advances in the ever evolving-field of Materials Science & Nanotechnology.

Importance and scope-

Materials Science is a broad, diverse and [multidisciplinary field](#). It is continuous interaction with basic disciplines and is also contributing to meet all Grand Societal Challenges. This contribution is such that numerous reports have been produced in recent years in Europe and world - wide, with the aim of drawing a comprehensive picture and proposing coordinated actions towards the establishment of coherent strategies in the field. The present report subscribes to this perspective, with a particular goal which is to contribute to the establishment of a comprehensive view of the role in efficient development of key enabling technologies.
